Richard Collopy

Otway Coast an indigenous perspective, the significance of estuaries

Richard is a consultant for the MAAR language area from the Painkalac Creek to the Hopkins River. He specialises in interpreting the environment from an indigenous perspective to community and government and school students. Much of his work involves protecting and managing cultural heritage within the region as a consultant to Parks Victoria.

Jeff Yugovic

Estuary Vegetation Classes of the region and adapting to change

Jeff works for BIOSIS Research and has over 25 years experience in the public and private sector in the surveying and assessing of salt marsh and vegetation classes throughout Victoria. Some work of note has occurred on the Barwon River, Spit Nature Reserve within Port Phillip Bay. Currently working on a state-wide survey of salt marsh with Victoria University and DSE, Jeff was involved as a consultant in the development of EEMSS.
