

45 Shrubby Foothill Forest

EVCGroupNo: 6 GroupName: Dry Forests

EVCSubGroupNo: 6.2 SubGroupName: Sheltered and/or higher altitude

CCMA

EVCType: EVC

RegDescription: Shrubby Foothill Forest is widespread in the Wombat State Forest and adjacent areas (CVU). It is a drier form of the EVC than that in the Otways region. It occurs on moderately fertile soils derived from Ordovician shale and sandstones at elevations of 500-900m asl. At higher elevations it may occur on all slopes and aspects, while in drier areas it is restricted to sheltered slopes and gullies. Annual rainfall varies from 750-1150mm. This EVC has a long history of intense and repeated logging. The overstorey is a medium forest usually dominated by Messmate, though Broad-leaved Peppermint, Narrow-leaf Peppermint, Candlebark and Mountain Grey Gum may also be present. The mid stratum is low, often structurally open and diverse in narrow-leaved or ericoid shrubs. Species include Narrow-leaf Wattle, Common Heath, Moth Daisy-bush, Mueller's Bush-pea, Golden Bush-pea and Gorse Bitter-pea. The ground layer is sparse and species poor and includes Ivy-leaf Violet and Common Raspwort. Forest Wire-grass and Austral Bracken are common and may dominate the understorey in response to disturbance.

Shrubby Foothill Forest occurs widely in the Otways (OR/OP/WP), on exposed aspects and slight to moderate slopes. It has been identified both close to and remote from the coast, with an average annual rainfall greater than 1100mm. The soils are clay loams over medium to heavy clays. Closer to the coast the clay loams become more shallow over rock. Average altitude is 180m asl. The overstorey is a medium forest dominated by Messmate to 30m tall. Mountain Grey Gum is also common. Occasional other species include Scentbark, Brown Stringybark, the rare Brooker's Gum, Blue Gum, Swamp Gum, Narrow-leaf Peppermint, Mountain Ash and Manna Gum. There is no understorey tree layer. A diverse shrub layer characterizes this EVC. The most common species include Hop Goodenia, Prickly Moses, Snow Daisy-bush, Prickly Currant-bush, Narrow-leaf Wattle, Privet Mock-olive, Tree everlasting, Prickly Tea-tree, Hazel Pomaderris and Large-leaf Bush-pea. The ground stratum lacks diversity and is often dominated by Austral Bracken and Forest Wire-grass (especially in response to disturbance). Other species include Tall Sword-sedge, the rare Cluster-headed Mat-rush, the vulnerable Swamp Flax-lily and Ivy-leaf Violet. Mountain Clematis is the only climber.
